

Enforcement Division

Presents Course # 272

Gas Turbines/Power Plants

With an increase in demand of the electric utility industry, stationary gas turbines have become more popular in recent years as combined-cycles, peaking power plants and cogeneration facilities. The course discusses uses of gas turbines, fundamentals of operation of modern turbines with emphasis on state-of-the-art controls to achieve some of the lowest emission concentrations for this source category. The course also discusses combined cycles with HRSG units, steam turbines & power generation. This is followed by a detailed discussion on emissions and control techniques such as Dry Low-NOx combustors with staged combustion, water or steam injection followed by SCR & CO catalysts. Applicable federal & local BACT regulations, permitting requirements, and agency inspection procedures & safety concerns are thoroughly discussed. **Hard Hat, Safety Shoes & Glasses required.**

October 26, 2006

8:30 AM - 5:30 PM

San Joaquin Valley APCD

1990 E Gettysburg

Fresno, CA 93726
